Silent Voices believes that God is the Author of life, that all human life is valuable - born and preborn - and that abortion is never the answer to an unplanned, "crisis" pregnancy. We are dedicated to giving compassionate, practical assistance to women experiencing unplanned pregnancies, providing accurate information about the realities and possible consequences of abortion, and offering help, hope and healing through a personal relationship with Jesus Christ to women already struggling with the trauma of abortion.

For My Valentine

Continued from the front page...

And there could be more, because doctors won't file every adverse event report. SO - there may be many, many more girls out there who have had a bad reaction to Gardasil that the FDA and the CDC will never hear about.

Gardasil also appears to act as a form of birth control. Cynthia Janak, a research journalist and RenewAmerica.com columnist from Illinois, states that some of the girls she's interviewed had menstrual irregularities after their vaccination with Gardasil. Some of them actually stopped menstruating for up to six months, and when their periods did return they were extremely heavy, and very painful.

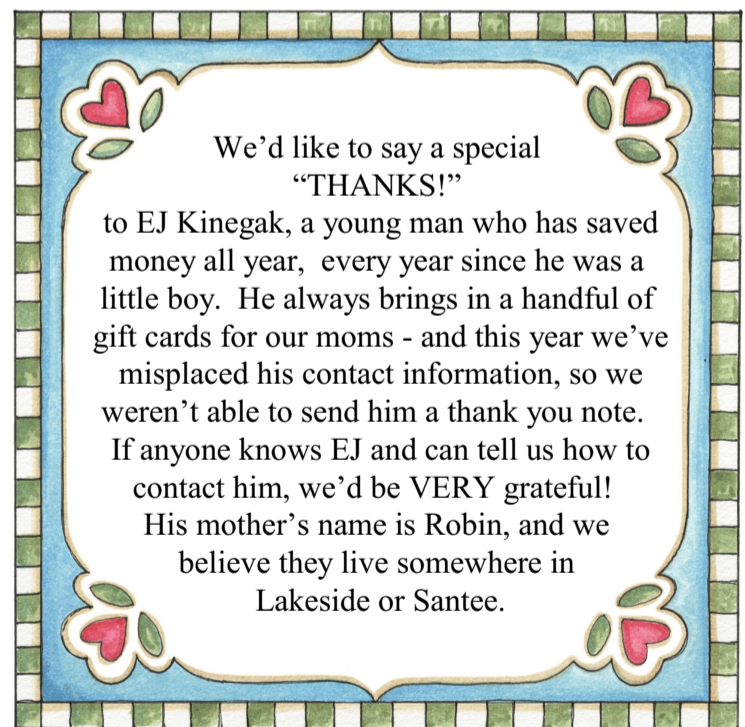

There are countless testimonies from young women who have been injured by Gardasil on numerous websites and blogs. No other vaccine in the world has generated this much bad publicity on the internet by unpaid "regular" folks who don't want anyone else to go through their hellish experiences.

In the news recently was the report that Merck has won approval in the US to sell its vaccine to boys and young men. AND - another drug company has developed an HPV vaccine, and their product will be available soon. Both of these companies stand to make a great deal of money from the sales of these drugs - but at what price? Do we really want our sons and daughters to be vaccinated with something that has had a less than stellar performance? Do we want to risk their health - and their lives - to protect them against only 4 of the over 100 strains of HPV? That's a question every parent needs to carefully consider.

This information was taken from an article written by Lisa Bastian in the November-December issue of "Celebrate Life" magazine.

Christmas Thanks!

We are SO grateful to all of you who donated gift cards for our Bridges to Motherhood moms this Christmas! They were SO blessed to be able to purchase something special for their child!

Bridges to Motherhood

Expanding our Bridges program to four meetings/month, and changing how they "shop" in our "Mommy and Me Market" has really helped us get to know our moms better, as we're able to spend more one-on-one time with them. What we're learning, though, is that our moms are living on the edge, and some of them are in very difficult situations. We would ask that you pray that we're able to make an even bigger difference in their lives!
